Technical Skills

Languages: TypeScript/JavaScript, Go, Python, HTML/CSS, Java, Bash, C, SQL, Rust

Frontend: React, Next.js, Tailwind, Svelte, ShadCN, Redux, Zustand

Backend: Node.js, Bun, Deno, Express.js, Flask, Gin, REST, GraphQL, gRPC, Websockets

Databases: PostgreSQL, MySQL, MongoDB, Redis, Kafka, DynamoDB, Clickhouse

Infrastructure: Docker, Kubernetes, Helm, Terraform, Pulumi, AWS, GCP, Vercel

Experience

Retool

July 2023 - Present

Software Engineer

San Francisco, CA

- Independently designed and shipped a new frontend metrics pipeline to replace Amplitude, processing **5M+ events/day** and enabling more flexible product iteration
- Improved response times on core product routes from **2s to 200ms** by introducing caching, eliminating inefficient async patterns, and optimizing database queries
- Led migration from Datadog to a self-hosted observability stack, saving **\$750K+** annually
- Defined React Error Boundaries as a company-wide quality metric, resulting in a reduction of app crashes by **95%**
- Drove rollout and customizations for enterprise customers including Apple and NBCU representing **\$2.5M+ ARR**
- Built a telemetry agent for on-prem deployments, granting proactive visibility into customer health, product usage, and support issues
- Engineered an endpoint ownership system that routes pages to correct service owners, reducing on-call burden

Snapchat

May 2022 - August 2022

Software Engineer Intern

Toronto, ON

- Implemented hybrid encryption workflows on AWS and GCP to secure sensitive data for **100M+ users**
- Built a microservice handling **1.7M+ requests/day** for model-training data processing, improving the quality of inputs used to train AR filters

Bonsai

Jan 2021 - August 2021

Software Developer Intern

Toronto, ON

- Engineered an external order-fulfillment system that processed over **\$1.6M** in volume within 2 months
- Built partner-facing dashboard features in React, including search, filtering, exports, and product verification
- Led migration of an embedded e-commerce widget from React to Preact, reducing bundle size and improving page load performance
- Strengthened account security by implementing a password reset flow
- Built shared UI components used across the product, including carousel and cart experiences

Projects

Jobby | *Golang, PostgreSQL, SQL, Webhooks*

- Built and launched a job search platform partnering with Simplify (YC Startup)
- Drove traffic by operating the largest CS Discord, converting community usage into an uplift of **100K+ users**

Resume Parser | *React, Next.js, JavaScript, jQuery, HTML/CSS, Vercel, Redis*

- Created a website with over **1.5M page views** helping job seekers identify parsing errors before applying

Course Central | *React, Next.js, TypeScript, Chakra-UI, Python, Selenium, MongoDB*

- Built a full-stack platform combining historical grade distributions and RateMyProfessor data to support students
- Created mobile companion app with forums enabling peer discovery and collaboration with **14K+ users**

Education

Queen's University

September 2019 - May 2023

Bachelor of Computing (Honours) in Software Design

Kingston, ON

- Awards:** Ratehub.ca Award in Computing, Dean's Honour List × 4
