Experience

Metronome, A Stripe Product July 2026 - Present
Software Engineer *San Francisco, CA*

- Working on usage-based billing features for Anthropic, OpenAI, HuggingFace, and more

Retool July 2023 - May 2026
Software Engineer *San Francisco, CA*

- Independently designed and shipped a frontend metrics pipeline processing **5M+ events/day**, replacing Amplitude and giving product teams greater control over instrumentation and analytics
- Improved p95 latency from **2s to 200ms** by introducing caching, eliminating inefficient async patterns, and optimizing database queries
- Led migration from Datadog to a self-hosted observability stack, saving **$750K+** annually
- Reduced app crashes by **95%** by establishing React Error Boundary coverage as a company-wide reliability metric and driving adoption
- Drove rollout and customizations for enterprise customers including Apple and NBCU representing **$2.5M+ ARR**
- Built a telemetry agent for on-premise deployments that surfaced customer health and usage signals, enabling proactive detection of support issues
- Built an endpoint ownership system that routes incidents to service owners, reducing on-call triage overhead

Snapchat May 2022 - August 2022
Software Engineer Intern *Toronto, ON*

- Secured sensitive data for **100M+ users** by implementing hybrid encryption workflows on AWS and GCP
- Built a microservice handling **1.7M+ requests/day** for model-training data processing, improving the quality of inputs used to train AR filters

Bonsai Jan 2021 - August 2021
Software Developer Intern *Toronto, ON*

- Engineered an external order-fulfillment system that processed over **$1.6M** in volume within 2 months
- Built partner-facing dashboard features in React, including search, filtering, exports, and product verification
- Migrated an embedded e-commerce widget to Preact, reducing bundle size and improving page load performance

Projects

Resume Parser | *React*, *Next.js*, *JavaScript*, *jQuery*, *HTML/CSS*, *Vercel*, *Redis*

- Created a website with over **1.5M page views** helping job seekers identify parsing errors before applying

Jobby | *Golang*, *PostgreSQL*, *SQL*, *Webhooks*

- Built and launched a job search platform partnering with Simplify (YC Startup)
- Drove traffic by operating the largest CS Discord, converting community usage into an uplift of **100K+ new users**

Course Central | *React*, *Next.js*, *TypeScript*, *Chakra-UI*, *Python*, *Selenium*, *MongoDB*

- Built a full-stack platform combining historical grade distributions and RateMyProfessor data to support students
- Created mobile companion app with forums enabling peer discovery and collaboration with **14K+ students**

Education

Queen's University September 2019 - May 2023
Bachelor of Computing (Honours) in Software Design *Kingston, ON*

Technical Skills

Languages: TypeScript/JavaScript, Go, Python, HTML/CSS, Java, Bash, C, SQL, Rust
Frontend: React, Next.js, Tailwind, Svelte, ShadCN, Redux, Zustand
Backend: Node.js, Bun, Deno, Express.js, Flask, Gin, REST, GraphQL, gRPC, Websockets
Databases: PostgreSQL, MySQL, MongoDB, Redis, Kafka, DynamoDB, Clickhouse
Infrastructure: Docker, Kubernetes, Helm, Terraform, Pulumi, AWS, GCP, Vercel
